

ASPIRING CIVIL/
MECHANICAL ENGINEER

Devenel Joseph

Profile

Devenel was born on February 25, 1995. His mother was mentally ill and his grandmother couldn't care for him, so he was brought to HHH in January of 2004. He will graduate High School in June 2018.

Plans to attend **Université Chrétienne De La Communauté De Caiman & Université GOC**

Career Goals/My Impact on Haiti

I would like to major in Mechanical Engineering with an emphasis in Automotive/Robotics or perhaps heating and air conditioning. Ultimately I would like to work in the manufacturing industry in Haiti. Eventually I would like to have my own manufacturing business, where I could be an asset to the people in my community, especially for people outside of the capital in the provinces where there is a need for reliable employers. Education is the greatest thing that anyone in life can obtain. It will help me achieve both short-term and long-term goals as well as open many doors and opportunities for me and my fellow citizens.

My Testimony

I would be the first person in my family to finish high school and attend college. Being in HHH gave me another chance in life, and it is more than a home where kids are fed and clothed. Children are sent to school, taken to the doctor and they help to mold all the kids to become better people and push us to go out into the world to do the same. HHH has helped me to see that you can always find a way to assist others with what you have and God will always bless you and open doors for you. I wish to become the leader God wants me to be, so I can set a prime example for my family and fellow citizens. I hope to show others that you can be anything with a little bit of faith, perseverance and determination as long as you put God first in everything that you are doing.
